Introduction to AIM Receiver Manager

AIM Receiver Manager allows you to transfer information between AIM (Agency/Attorney Interface Manager) clients and outside collection agencies and attorneys. It exports and imports data using XML file layouts that are proprietary to AIM.

What's New in AIM Receiver Manager

The following Service Updates (SU) introduced changes and enhancements in AIM Receiver Manager 13.0.

2024 R1

• New File Type CDOC in AIM Receiver

A new file type CDOC which can be exported using AIM and imported using AIM Receiver.

This file will include information related to the documents attached to an account.

A new record type CDOC is also created in the existing CPLC file

• New configuration options AIM Receiver

New configuration options related to CDOC file in AIM and AIM Receiver.

This configuration will allow users to select the document types which should be included in the CDOC file

• AIM Receiver Config Changes for Dispute and Complaint Codes

Added new configuration in AIM and AIM Receiver to map Complaint and Dispute Codes of clients and agencies

which will then be used in the import and export files (CCPT/ACPT and CDIS/ADIS)

2020 R1

Phone consent

- Added phone consent data to the Demographics (CDEM) import file. For more information, see <u>Import Demographic Data</u>.
- Added phone consent data to the Demographics (ADEM) export file. For more information, see <u>Export Demographic Data</u>.

Log on to AIM Receiver Manager

Use the Latitude Logon dialog box to log on to AIM Receiver Manager.

To log on to AIM Receiver Manager

- 1. Do one of the following:
 - On your desktop, click the shortcut to AIM Receiver Manager.
 - Click Start > All Programs > Interactive Intelligence > Interaction Collector > Agency Interface Manager > AIM Receiver.

The Latitude Logon dialog box appears.

🧏 Latitude Login	
User Name:	
Password:	
Database:	Default Instance
🕅 Log in using Wi	idows authentication
Cancel	Qkay

Note: Premises-based clients can use Windows authentication to bind Latitude users to their Windows identity to permit logging on to Latitude automatically. Windows authentication is not available for hosted clients. To log on using Windows authentication, select the **Log in using Windows authentication** check box and provide your Windows user name and password.

- 2. In the **User Name** box, type your Latitude user name.
- 3. In the **Password** box, type your Latitude password. As you type your password, periods display instead of the typed characters.
- 4. Click Okay. The AIM Receiver Manager window appears.

Help Overview

AIM Receiver Manager help provides you with information for using AIM Receiver Manager. To locate and view a topic, use the table of contents, index, and search features.

To open help

In menu bar, click **Help** and then click **Help on AIM Receiver Manager**. The **AIM Receiver Manager Help** window appears.

Tip: To adjust the width and height of the window or its panes, click the edge of the window or pane and drag it up or down, left or right.

- 1. **Toolbar:** Allows you to hide or show the tabs and **Navigation** pane, move forward and backward through topics, and print the currently displayed topic.
- 2. Tabs: Displays the following:
 - **Contents:** Displays the table of contents. To display a topic in the **Content** pane, expand a book and then click the link.
 - **Index:** Displays the index. To display a topic in the **Content** pane, type a keyword or phrase in the box (or scroll through the list) and then click the link in the list.

- **Search:** Displays the <u>search feature</u>. To display a topic in the **Content** pane, type a keyword or phrase in the box and then press **Enter**. In the search results, click the link.
- **Glossary:** If available, displays a list of terms and their definitions. To display a definition, click the term.
- 3. **Breadcrumbs:** Displays your current location within the help system. When you click a breadcrumb, the related topic displays.
- 4. **Content toolbar:** Displays an option to send feedback through an email message to Latitude by Genesys Documentation.
- 5. **Content pane:** Displays the contents of a topic. To view the **Content** pane menu, right-click in the **Content** pane.

Search feature

You can use the search feature to search for topics that contain words or phrases that you specify. You formulate a search query following a specific <u>set of rules</u>. You can include <u>wildcard expressions</u>, <u>Boolean</u> <u>operators</u>, and <u>nested expressions</u> in your search query. A list of topics that match your search criteria appear in the search results. When you click a topic title in the search results, the content of that topic appears in the **Content** pane.

Search syntax

The basic rules for formulating search queries are:

- Searches are not case-sensitive, meaning you can type uppercase or lowercase characters.
- You cannot search for a single character or the following reserved words: an, and, as, at, be, but, by, do, for, from, have, he, in, it, not, of, on, or, she, that, the, there, they, this, to, we, which, with, you.
- The search engine ignores punctuation marks and special characters such as @#\$%^&()=+[]\.
- Enclose phrases and terms that include a period (such as a file name with an extension) in double quotation marks.

Wildcard expressions

Wildcard expressions allow you to search for one or more characters using a question mark or asterisk. A question mark represents a single character, while an asterisk represents one or more characters.

Search for	Example	Result
Topics with text that starts with one or more specified characters and ends in any character or number of characters		Returns all topics with text that starts with the specified characters (for example, log, logon, logging).
Topics with text that starts with the specified characters, has a single	32?57	Returns all topics with text that has any character where you placed a question mark (for example, 32?57 returns 32257, 32457, and 32857).

character that can be anything, and ends in the specified characters		
Topics that contain all the words specified, in any order or placement within the topic	account status	Returns all topics with both account and status, but not necessarily as a phrase or in the order specified. For example, the search returns topics with "the account status" or "the status of the account"
Topics that contain the specified phrase	"account status"	Returns all topics with account status as a phrase. For example, the search returns topics with "the account status" but not "the status of the account"

Boolean operators

Boolean operators (AND, OR, NOT, NEAR) allow you to create a relationship between terms. If you don't specify an operator, the system uses AND by default.

Search for	Example	Result
AND	account AND	Returns all topics with both account and status, but not necessarily as a phrase or in the order specified. For example, the search returns topics with "the account status" or "the status of the account"
OR	account OR status	Returns all topics with either account or status, or both.
NOT	account NOT status	Returns all topics with account but not status.
NFAR	account NEAR status	Returns all topics where account is within eight words of status.

Nested expressions

Nested expressions allow you to perform complex searches. For example, queue AND ((collector OR clerical) not supervisor) finds topics containing queue and collector but not supervisor, or containing queue and clerical but not supervisor. As with mathematical expressions, the system evaluates expressions in parentheses first. If there is no parenthesis, the system evaluates the expression from left to right. For example, queue NOT (clerical OR supervisor) finds topics containing queue but not clerical or supervisor. Queue NOT clerical OR supervisor finds topics containing queue but not clerical, or topics containing supervisor.

[Account Status]: Status to change an account to when you aren't objecting to an account recall.

When there are promises to pay: If selected, when AIM Receiver Manager receives a pending recall request for an account with a promise-to-pay arrangement, it triggers a recall objection.

When there are post dated checks: If selected, AIM Receiver Manager receives a pending recall request for an account with post-dated check or credit card transactions, it triggers a recall objection.

Received a payment with this number of days: Number of days after AIM Receiver Manager receives a payment that it no longer triggers a recall objection. If AIM Receiver Manager receives a payment before the number of days have passed, it triggers a recall objection.

When the account is in one of the following statuses: If a check box is selected, that account status triggers a recall objection.

When the account is in one of the following queues: If a check box is selected, that work queue triggers a recall objection.

3. Complete the information and then click **Apply**.

Configure Payments

Use the **Payments** tab in the **Client Configuration** window to configure payments for a client. You can configure the system to check payment and adjustment transactions for echo-back to prevent recording duplicate transactions. Echo-back is when you send a payment file to the agency or attorney who holds the account and then receive a payment file that contains that same payment or adjustment.

To configure payments

- 1. In the **AIM Receiver Manager** window, in the Name column of the data grid, click the Client icon. The **Client Configuration** window appears, with the **General** tab selected.
- 2. Click the **Payments** tab.

- 3. To check payment and adjustment transactions for echo-back, do the following:
- a. Select the Check Payments/Reversals for Echo Back check box.
- b. Do one of the following:
 - To compare the date in the payment file to the date you added the payment to the system, click the **Date Entered** check box.
 - To compare the date in the payment file to the payment date, click the **Date Paid** check box.
 - To compare the date in the payment file to the payment invoice date, click the **Invoiced Date** check box.

c. Type or select the maximum number of days after the date in the payment file that AIM Receiver Manager considers the transaction an echo-back.

- 4. To send an overpayment amount, select the **Send Overpaid Amount** check box and then click **Apply**.
- 5. To allow batch processing of payment transactions, do the following:
- a. Select the Use Payment Batching (Improves Performance) check box.

b. In the **Batch Size** box, specify the batch size to use when processing transactions. We recommend that you use a batch size of 50-200. If you select the **Use Payment Batching (Improves Performance)** check box and don't specify a batch size, AIM Receiver defaults to a batch size of 50.

6. Click **Apply**.

Configure Note Work Efforts

Use the **Note Efforts** tab on the **Work Effort** tab in the **Client Configuration** window to configure work efforts related to notes. You can configure a note work effort using an action and result code together, or just one of the two.

To configure note work efforts

- 1. In the **AIM Receiver Manager** window, in the Name column of the data grid, click the Client icon. The **Client Configuration** window appears, with the **General** tab selected.
- 2. Click the Work Effort tab and then click the Note Efforts tab.

Action Category: Category that your organization assigned to group the note action.

Action Code: Code that your organization assigned to identify the note action.

Action Text: Comment or description that your organization associated to the note action.

Action: Unique code that identifies an action in Latitude.

Result: Unique code that identifies the result of an action in Latitude.

3. To add a note effort, click **Note Effort**. AIM Receiver Manager adds a blank row to the data grid.

4. Complete the information and then click **Apply**.

Import All Files in a Folder

Use the **Batch Execution** window to import AIM client data from all the files in a folder. You can select a folder for a specific client and only import those files, or, you can select a folder at a higher level and

import files for multiple clients. AIM Receiver Manager flags for removal invalid files and files that AIM Receiver Manager processed previously.

To import all files in a folder

1. In the menu bar, click Actions > Import > Import All Files From Folder. The Batch Execution window appears.

1	Batch Ex	ecution

- 5. In the toolbar, click **Remove Invalid Files**. AIM Receiver Manager deletes invalid files from the data grid, and only displays the valid files. If AIM Receiver Manager imported a file previously, the **Processed** check box is selected.
- To delete files that AIM Receiver Manager processed previously to prevent duplicate processing, click the file and then press the **Delete** key. In the confirmation dialog box, click **Yes**. AIM Receiver Manager deletes the file.
- 7. In the toolbar, click Import Files. A progress bar shows that status of the import process.
- 8. When the import is complete, in the toolbar, click Exit.
- 9. To review any processing errors, do the steps to View Client History.
- 10. To view batch numbers for imported payments, open the **Payment Entry** window in Latitude. AIM Receiver Manager notes the exceptions for payment reversals without a matching payment.

Import Account Recalls

Use the **Process** tab in the **Client Configuration** window to import pending and final recalls received from the client for accounts that the client placed with your organization. For pending recalls, AIM Receiver Manager creates an objection file automatically for accounts that match the criteria specified on the **Pending Recall** tab. For final recalls, AIM Receiver Manager closes and returns accounts to the client with a queue level of "999" and a status of "RCL." Also, AIM Receiver Manager moves accounts to the desk specified on the **Final Recall** tab.

To import account recalls

- 1. In the **AIM Receiver Manager** window, in the Name column of the data grid, click the Client icon. The **Client Configuration** window appears, with the **General** tab selected.
- 2. Click the **Pending Recall** tab.

Export Overview

You have two options for exporting data from AIM Receiver. The first option is to export data for one or more clients for a specific type of data (for example, payments, recalls, notes). The second option is to export data for a specific client and type of data. Your client imports the exported data into AIM and AIM updates the account information in Latitude.

Export Data for Multiple Clients

Use the **Export** option in the **Actions** menu to export account updates for a specific type of data for clients that placed accounts with your organization. Data types include bankruptcy, account closings, deceased debtor, demographics, notes, post-dated transactions, and reconciliation. For information about exporting acknowledgments or payments, see <u>Export Acknowledgments for One or More Clients</u>.

To export data for multiple clients

- 1. In the menu bar, click Actions > Export > and then click the type of data to export. The Browse for Folder dialog box appears.
- 2. Click the folder to export the files to and then click OK. The Client Selector dialog box appears.

Cli	ent Selector				2

				OK	Cancel
				Bananananan	

- 3. Do one of the following:
 - To export data for all clients, click All Receiver Clients.
 - To export data for specific clients, click **Selected Receiver Clients** and then click the clients to include in the export file.

Tip: To select multiple sequential clients, press and hold the **Shift** key and then click the first and last sequential client. To select multiple non-sequential clients, press and hold the **Ctrl** key and then click each client.

- 4. Click **OK**. A notification dialog box appears.
- 5. Click **OK**.

Export Acknowledgments for Multiple Clients

Use the **Export** option in the **Actions** menu to export acknowledgments indicating that your organization received data for the accounts that clients placed with your organization.

To export acknowledgments for multiple clients

- 1. In the menu bar, click Actions > Export > Acknowledgments. The Browse for Folder dialog box appears.
- 2. Click the folder to export the files to and then click **OK**. The **Acknowledgment Selector** dialog box appears.

3. Click the account placements to acknowledge.

Tip: To select multiple sequential placements, press and hold the **Shift** key and then click the first and last sequential placement. To select multiple non-sequential placements, press and hold the **Ctrl** key and then click each placement.

- 4. Click **OK**. A notification dialog box appears.
- 5. Click **OK**.

Feedback

Export Payments for Multiple Clients

Use the **Export** option in the **Actions** menu to export payments and adjustments that your organization received for accounts that clients placed with your organization.

To export payments for multiple clients

- 1. In the menu bar, click Actions > Export > Payments. The Browse for Folder dialog box appears.
- 2. Click the folder to export the files to and then click OK. The Invoice Selector dialog box appears.

- 3. Specify the date range for the invoices to include in the export file. The dialog box displays all invoices that your organization generated during the specified date range.
- 4. Click the invoices to include in the export file. The **Net Total** signifies the total payments and reversals combined.

Tip: To select multiple sequential invoices, press and hold the **Shift** key and then click the first and last sequential invoice. To select multiple non-sequential invoices, press and hold the **Ctrl** key and then click each invoice.

- 5. To include invoiced DA (decreasing adjustment) or DAR (decreasing adjustment reversal) transactions in the export file, select the **Include Adjustments to Accounts Since Last Time APAY File Was Sent** check box.
- 6. Click **OK**. The **Save As** dialog box appears.
- 7. Click the folder to save the export file to and then click **Save**. A notification dialog box appears.
- 8. Click OK.

Export Account Closings

Use the **Process** tab in the **Client Configuration** window to export data for accounts that your organization has closed for the client. You cannot export account closings without assigning the number of hold days. For more information, see <u>Configure Close Status Codes</u>.

To export account closings

1. In the **AIM Receiver Manager** window, in the Name column of the data grid, click the Client icon. The **Client Configuration** window appears, with the **General** tab selected.

3. In the **Export** section, click **Payments (APAY)**. The **Invoice Selector** dialog box appears.

Invoice Selector	
1. Select the date range for invoices	
10/28/2013 to 10/28/2013 2. Highlight the invoices to export	•
Drag a column header here to group by that column.	
Date ∑⊽⊐ Invoice ∑⊽⊐ Count ∑⊽⊐ Net To	otal∑⊽≠ ClientID ∑⊽≠
ľ	1
Include Adjustments To Accounts Since Last Time APAY	File Was Sent
	/ OK 🎽 Cancel

- 4. Specify the date range for the invoices to include in the export file. The dialog box displays all invoices that your organization generated for the client during the specified date range.
- 5. Click the invoices to include in the export file. The **Net Total** signifies the total payments and reversals combined.

Tip: To select multiple sequential invoices, press and hold the **Shift** key and then click the first and last sequential invoice. To select multiple non-sequential invoices, press and hold the **Ctrl** key and then click each invoice.

- 6. To include invoiced DA (decreasing adjustment) or DAR (decreasing adjustment reversal) transactions in the export file, select the **Include Adjustments to Accounts Since Last Time APAY File Was Sent** check box.
- 7. Click OK. The Save As dialog box appears.
- 8. Click the folder to save the export file to and then click **Save**. A notification dialog box appears.
- 9. Click OK.
