Introduction to Invoices

The Invoices program allows you to generate invoices for client remittance, issue statements of receivables, and create checks for your clients. Invoicing is based on account collection activity in Latitude.

Ensure that your organization set the following Accounting permissions for each user of Invoices:

- Access Invoices Program: Allows users to open Invoices.
- Enter AR Payments: Allows users to add accounts receivable payment information to apply toward invoices.
- Enter Bank Transactions: Allows users to add bank transactions for trust accounts.
- Generate Invoices: Allows users to generate invoices.
- Generate Statements: Allows users to generate statements.
- Print Checks: Allows users to print and reprint checks.

Log On to Invoices

Use the Interaction Collector Logon dialog box to log on to Invoices.

To log on to Invoices

1. Click **Start > All Programs > Interactive Intelligence > Interaction Collector > Invoices** or doubleclick the Invoices icon. The **Interaction Collector Logon** dialog box appears.

🎊 Interaction Collec	tor Logon	×
User Name;		
Password:		
Database:	Default Instance	♥
🗌 Log in using Win	dows authentication	
Cancel		<u>O</u> kay

- 2. In the **User Name** box, type your Latitude user name.
- 3. In the **Password** box, type your Latitude password. As you type your password, periods display instead of the typed characters.
- 4. Click Okay. The Invoices window appears.

Note: If your agency has over 1,000 customers, a dialog box appears, prompting you to bypass loading of all customers. To prevent slow response times when opening the **Invoices** window, click **No**. A second dialog box appears, indicating the operation may take several moments to return results. Click **No** again.

- 1. Menu: Displays the commands that are available for the window.
- 2. **Navigation pane**: Displays the available customers. The icons indicate if the customer is the parent customer, child customer, or a standard customer.

lcon	Description
-92	Parent customer. You can use parent customers to combine invoices for multiple customers under one invoice. For example, your agency may hold accounts for a major company (parent customer) that has several subsidiaries (child customers).
2	Child customer. You can assign child customers to a parent customer for invoicing purposes. You cannot invoice a child customer separately.

Standard customer. Customers that your organization hasn't associated to other customers.

3. **Tabs:** When you click a customer in the **Navigation** pane, the associated information appears on the selected tab.

Help Overview

Invoices help provides you with information for using Invoices. Use the table of contents, index, and search features to locate and view a topic.

To open help

In the "\Interactive Intelligence\Interaction Collector\Documents" folder, double-click Invoices.chm.

Tip: To adjust the width and height of the window or its panes, click the edge of the window or pane and drag it up or down, left or right.

- 1. **Toolbar:** Displays options for the help window.
- 2. Tabs: Displays the following:

Contents: Displays the table of contents. To display a topic in the **Content** pane, expand a book and then click the link.

Index: Displays the index. To display a topic in the **Content** pane, type a keyword or phrase in the box (or scroll through the list) and then click the link in the list.

Search: Displays the <u>search feature</u>. To display a topic in the **Content** pane, type a keyword or phrase in the box and then press **Enter**. In the search results, click the link.

Glossary: Displays a list of terms and their definitions. To display a definition, click the term.

- 3. **Breadcrumbs:** Displays your current location within the help system. When you click a breadcrumb, the related topic displays.
- 4. **Content toolbar:** Displays an option to send feedback through an email message to Latitude by Genesys Documentation.
- 5. **Content pane:** Displays the contents of a topic. To view the **Content** pane menu, right-click in the **Content** pane.

Search feature

You can use the search feature to search for topics that contain words or phrases that you specify. You formulate a search query following a specific <u>set of rules</u>. You can include <u>wildcard expressions</u>, <u>Boolean</u> <u>operators</u>, and <u>nested expressions</u> in your search query. A list of topics that match your search criteria appear in the search results. When you click a topic title in the search results, the content of that topic appears in the **Content** pane.

Search syntax

The basic rules for formulating search queries are:

- Searches are not case-sensitive, meaning you can type uppercase or lowercase characters.
- You cannot search for a single character or the following reserved words: an, and, as, at, be, but, by, do, for, from, have, he, in, it, not, of, on, or, she, that, the, there, they, this, to, we, which, with, you.
- The search engine ignores punctuation marks and special characters such as @#\$%^&()=+[]\.
- Enclose phrases and terms that include a period (such as a file name with an extension) in double quotation marks.

Wildcard expressions

Wildcard expressions allow you to search for one or more characters using a question mark or asterisk. A question mark represents a single character, while an asterisk represents one or more characters.

Search for	Example	Result
Topics with text that starts with one or more specified characters and ends in any character or number of characters	log or log*	Returns all topics with text that starts with the specified characters (for example, log, logon, logging.)
Topics with text that starts with the specified characters, has a single character that can be anything, and ends in the specified characters	32?57	Returns all topics with text that has any character where you placed a question mark (for example, 32?57 returns 32257, 32457, and 32857.)
specified, in any order or placement	account status	Returns all topics with both account and status, but not necessarily as a phrase or in the order specified. For example, the search returns topics with "the account status" or "the status of the account"

Topics that contain the specified phrase	account status"	Returns all topics with account status as a phrase. For example, the search returns topics with "the account status" but not "the status of the account"
--	--------------------	--

Boolean operators

Boolean operators (AND, OR, NOT, NEAR) allow you to create a relationship between terms. If you don't specify an operator, the system uses AND by default.

Search for	Example	Result
AND	account AND	Returns all topics with both account and status, but not necessarily as a phrase or in the order specified. For example, the search returns topics with "the account status" or "the status of the account"
OR	account OR status	Returns all topics with either account or status, or both.
NOT	account NOT status	Returns all topics with account but not status.
NFAR	account NEAR status	Returns all topics where account is within eight words of status.

Nested expressions

Nested expressions allow you to perform complex searches. For example, queue AND ((collector OR clerical) not supervisor) finds topics containing queue and collector but not supervisor, or containing queue and clerical but not supervisor. As with mathematical expressions, the system evaluates expressions in parentheses first. If there is no parenthesis, the system evaluates the expression from left to right. For example, queue NOT (clerical OR supervisor) finds topics containing queue but not clerical or supervisor. Queue NOT clerical OR supervisor finds topics containing queue but not clerical, or topics containing supervisor.

Generate an Invoice for a Specific Customer

Use the **Invoice Options** dialog box to specify what information to include on the invoice and then generate the invoice for a specific customer. Before generating invoices, confirm that you processed all payment batches.

Note: For customers associated to a parent customer (subsidiaries), The Invoices program only generates invoices for the parent customer.

To generate an invoice for a specific customer

 In the Invoices window, in the Navigation pane, right-click a customer and then click Invoice Customer. The Invoice Options dialog box appears, with the customer name and number at the top.

Invoice Options x
0000004 - ABC CUSTOMER
Invoice Date
Invoice will be dated: (Select date) 4 / 1 /2019 💌
Payment Date Range
Include all uninvoiced payments.
C Include payments with entered date range of:
3/2/2019 - 4/1/2019 -
Direct Payments
Bypass Direct Payments and do not include them on the Invoice
Include Direct Payments
Match PURs (Exclude from Invoice)
Match the Reversal with the Payment that was reversed.
I Match the Reversal with any matching payment for the same account.
Statement
Print Statement with Invoice
Print Statement even if Invoice has no items.
Preview Export Printer Cancel

Invoice will be dated: Date to appear on the invoice. The date defaults to the current date. To change the date, click the arrow and then click a date in the calendar.

Include all uninvoiced payments: If selected, the invoice includes all payments that your organization hasn't invoiced.

Include payments with entered date range of: If selected, the invoice only includes payments and adjustments within the specified date range that your organization hasn't invoiced. Specify the date range or accept the default, which includes all payments and adjustments since your organization last created an invoice for this customer. The first box is the beginning date and the second box is the ending date.

Bypass Direct Payments and do not include them on the invoice: If selected, the invoice doesn't include payments made directly to the customer.

Include Direct Payments: If selected, the invoice includes payments made directly to the customer.

Match the Reversal with the Payment that was reversed: If selected, the invoice doesn't include reversals that the Invoices program matches to a reversed payment.

Match the Reversal with any matching payment for the same account: If selected, the invoice doesn't include reversals that the Invoices program matched to any matching payment for the same account.

Note: If you select both check boxes, the Invoices program matches the reversal to the reversed payment as long as your organization hasn't invoiced the reversed payment. If your organization invoiced the reversed payment but hasn't invoiced the make-up payment, the Invoices program matches the reversal to the make-up payment. If you clear both check boxes, the invoice includes all payments and reversals.

Print Statement with Invoice: If selected, the Invoices program prints a customer statement along with the invoice.

Print Statement even if Invoice has no items: If selected and the invoice doesn't have any line items, the Invoices program prints a customer statement. If cleared and the invoice doesn't have any line items, the Invoice program doesn't print a statement.

- 2. Complete the information.
- 3. To preview the invoice, do the following:
 - a. Click **Preview**. The invoice displays in the **Invoice [Customer Code][Invoice Number] -**Latitude Report Viewer window.

<u>Invoices</u>

Generate Invoices for a Group of Customers

Use the **Invoice Options** dialog box to specify what information to include on the invoices and then generate invoices for the specified group of customers.

Note: The Invoices program only invoices customers associated to a parent customer (subsidiaries) under the parent customer.

To generate invoices for a group of customers

- 1. In the **Invoices** window, do one of the following:
 - To generate invoices for all customers, from the View menu, click All Customers. In the Navigation pane, click All Customers.
 - To generate invoices for customers that your organization invoices monthly, from the View menu, click Monthly Customers. In the Navigation pane, click All Monthly Customers.
 - To generate invoices for customers that your organization invoices weekly, from the View menu, click Weekly Customers. In the Navigation pane, click All Weekly Customers.
 - To generate invoices for customers that your organization invoices on demand, from the View menu, click On Demand Customers. In the Navigation pane, click All On Demand Customers.
 - To generate invoices for customers in the default customer group, from the **View** menu, click **Default Group**. In the **Navigation** pane, click **Default Group**.
 - To generate invoices for customers in a specific customer group, from the **View** menu, click the group name. In the **Navigation** pane, click the group name.
- 2. From the **Action** menu, click **Invoice All**. The **Invoice Options** dialog box appears, with the name and number of the first customer in the group at the top.

☐ Use these settings for all Invoices in this run.

Invoice will be dated: Date to appear on the invoice. The date defaults to the current date. To change the date, click the arrow and then click a date in the calendar.

Include all uninvoiced payments: If selected, the invoice includes all payments that your organization hasn't invoiced.

Include payments with entered date range of: If selected, the invoice only includes payments and adjustments within the specified date range that your organization hasn't invoiced. Specify the date range or accept the default, which includes all payments and adjustments since your organization last created an invoice for this customer. The first box is the beginning date and the second box is the ending date.

Bypass Direct Payments and do not include them on the invoice: If selected, the invoice doesn't include payments made directly to the customer.

Include Direct Payments: If selected, the invoice doesn't include payments made directly to the customer.

Match the Reversal with the Payment that was reversed: If selected, the invoice doesn't include reversals that the Invoices program matches to a reversed payment.

Match the Reversal with any matching payment for the same account: If selected, the invoice doesn't include reversals that the Invoices program matched to any matching payment for the same account.

Note: If you select both check boxes, the Invoices program matches the reversal to the reversed payment as long as your organization hasn't invoiced the reversed payment. If your organization invoiced the reversed payment but hasn't invoiced the make-up payment, the Invoices program matches the reversal to the make-up payment. If you clear both check boxes, the invoice includes all payments and reversals.

Print Statement with Invoice: If selected, the Invoices program prints a customer statement along with the invoice.

Print Statement even if Invoice has no items: If selected and the invoice doesn't have any line items, the Invoices program prints a customer statement. If cleared and the invoice doesn't have any line items, the Invoice program doesn't print a statement.

Use these settings for all Invoices in this run: If selected, the Invoices program applies these settings to all the customers. If cleared, the Invoices program displays the **Invoices Options** dialog box for each invoice to allow you to specify settings for each customer.

- 3. Complete the information.
- 4. To preview the first invoice in the group, do the following:
 - a. Click **Preview**. The invoice displays in the **Invoice [Customer Code][Invoice Number] -**Latitude Report Viewer window.

Undo a Specific Invoice

Use the **Summary of Invoices** tab in the **Invoices** window to undo a specific invoice. This option allows you to correct items on an invoice and then regenerate the invoice. Undoing an invoice doesn't undo checks that you printed. If you printed checks, delete them from the check register. For more information, see <u>Delete a Transaction From the Check Register</u>.

Note: The data grid includes invoices for parent customers only. If you select a child customer, the Invoices program displays the parent customer number to reference.

To undo a specific invoice

- 1. In the **Invoices** window, in the **Navigation** pane, click the customer or invoicing group for which to display invoices.
- 2. Click the **Summary of Invoices** tab.

Specify Default Invoicing Options

Use the **Options** dialog box to specify default invoicing options for your agency. These settings apply globally.

To specify default invoicing options

1. From the **View** menu, click **Options**. The **Options** dialog box appears.

Ø	Options
Custor	mers with balances due
~	Adjust Remittance Checks. Apply To Oldest First When an Invoice is created, if the Customer has outstanding Open Items due, offset any check to be created by the amount due from the Customer.
- Payme	ant Date Selection
(•	Select by the Payment Entered date.
С	Select by the Payment Date-Paid date. (Not recommended)
Rever	sal Matching
~	Match Reversals with the original payment and do not invoice either payment.
	Match Reversals with the payment that covers it.
origi	th boxes are checked the reversal will be matched with the original payment as long as the nal payment has not been invoiced. If the original payment has been invoiced the program natch the reversal with the make-up payment if that has not yet been invoiced.
Loggir	
	Enable Logging
	Save Options Exit

Adjust Remittance Checks: If selected, the Invoices program deducts from the checks created in the Invoices program the outstanding open items due from customers. The Invoices program reduces the invoice totals by the amount applied to outstanding accounts receivable items and prints another summary line on invoices to show the amount applied.

Apply to Oldest First: If selected, the system applies payments to the oldest accounts receivable balance first. This option is available when you select the **Adjust Remittance Checks** check box.

Select by the Payment Entered Date: If selected, the invoice includes payments based on the date a user added the payment to Latitude.

Feedback

Select by the Payment Date - Paid date: If selected, the invoice includes payments based on the date paid.

Match Reversals with the original payment and do not invoice either payment: If selected, the Invoices program matches reversals to the reversed payment and doesn't invoice either transaction.

Match Reversals with the payment that covers it: If selected, the Invoices program matches reversals to any matching payment for the same account and doesn't include them on invoices.

Note: If you selected both check boxes, the Invoices program matches reversals to the original payment as long as your organization hasn't invoiced the original payment. If your organization invoiced the original payment and hasn't invoiced the make-up payment, the Invoices program matches the reversals to the make-up payment. If you cleared both check boxes, the invoice includes all payments and reversals.

Enable Logging: If selected, the Invoices program creates the "Invoices.log" file in the C:\Program Files (x86)\Interaction Collector\AuditLogs directory. It contains any error messages generated in the Invoices program. You can send this file to Latitude by Genesys Support for assistance in troubleshooting invoicing issues.

2. Complete the information and then click **Save Options**.

Parent Customer: If your organization bills the customer as part of a parent company, click the folder to select a customer group.

Invoice Type: Determines the invoicing method for payment types.

- Separate: Creates separate invoices for each payment type.
- **Combined:** Includes all payment types together (combined) in one invoice.

Note: If you set the **Invoice Type** to **Combined**, **PC** (direct), the Invoices program includes payments in the fees withheld. If you set the **Invoice Type** to **Separate**, **PC** (direct), the Invoices program creates payments as open items for the invoice.

Invoice Frequency: Determines how often to send invoices to the customer.

Invoice Method: Method for invoicing the customer.

- Net: Subtracts your organization's fee from the customer invoice.
- **Gross:** Sends customer invoices with all monies included. The customer pays your fee based on the invoice information.

Invoice Sort: Order to sort the invoices.

Remit Method: Determines the method for remitting invoices. Invoice transactions appear in the check register automatically for customers with a remittance method of "check" or "ACH transfer." If the remittance method is "manual," add the invoice transactions to the check register manually.

- Manual: Your agency manually generates checks for the customer.
- Check: Your agency uses the Invoices program to print checks for the customer.
- **ACH Transfer:** Your agency uses the **Invoices** program to create ACH wire transfers for the customer.

Show [check boxes]: If selected, the corresponding information prints on the customer's invoices.

Number of days to allow payments to clear before including on invoice: Number of days to wait before including debtor payments on a customer invoice. If the debtor's check does not clear, use this option to avoid sending payment information to a customer.

Invoice Report: Crystal Reports file to use when creating invoices for the customer. This option allows you to use custom invoices for each customer. The default file is **BasicInvoice.rpt**.

3. Modify the settings as necessary and then click OK.

	1 checks to reprint
۰	Print the same Check Numbers originally used.
0	Check stock is pre-numbered and the next number is:
	Cancel Print OK

- 7. Do one of the following:
 - To use the same check numbers that you used originally, click **Print the same Check Numbers originally used**.
 - For pre-numbered check paper, click **Check stock is pre-numbered and the next number is:** and then, in the box, type the starting check number. The Invoices program doesn't print the check numbers on the pre-numbered check paper. The Invoices program does use the check number you type in the box to record the check numbers in the check register.
- 8. Click **OK**. The **Print** dialog box appears.
- Modify the settings as necessary and then click **Print**. The Invoices program prints the checks. The Invoices program records date printed and the check numbers in the **Selected Entries** data grid.
