Introduction to Web Access

Web Access is an advanced web-based program that complements Latitude. It allows a collection agency's clients to view account information in the collection agency's Latitude system. The collection agency has complete control over the features that are available to clients and report design. With the appropriate permissions, clients can do the following:

2. Search for accounts.
3. View account detail, such as debtor demographics, notes, payment history, and letter history.
4. Send update requests to the administrator.
5. Add notes to accounts.
6. Transfer files to and from the web server.
7. View reports.
8. View the audit trail.

What's New in Web Access

The following Service Updates (SU) introduced changes and enhancements to Web Access.

SU

[Log on to Web Access](#)

[Help Overview](#)

Log on to Web Access

Use the **Web Access** dialog box to log on to Web Access. **To log on to Web Access**

3. Open Web Access in your browser. The **Web Access Logon** page appears (with the company logo set up for your organization).

The image shows a login dialog box titled "Webaccess". It contains two input fields: "User Name:" and "Password:". Below the "Password:" field is a "Log In" button. There is also a link "Forgot your credential?" below the "Log In" button.

[Forgot your credential?](#)

User Name: Your Web Access user name.

Password: Your Web Access password. As you type your password, the system displays periods instead of the typed characters.

Forgot your credential?: Retrieves your Web Access credentials.

4. Complete the information and then click **Log In**. The **Web Access** page appears.

The image shows the main page of the Web Access system. At the top, there is a header bar with "Welcome GSadmin" on the left and navigation links "Home", "Search", "File Transfers", "Send a Message", and "Log Out" on the right. Below the header, there is a "Reports" section with a list of links: "Status", "Acknowledgement", "Batches", "Invoices", "StairSteps", and "Summary". Below the "Reports" section, there is an "Admin" section with links "Reports" and "Log".

[Introduction to Web Access](#)

[Help Overview](#)

Help Overview

Web Access help provides you with information for using Web Access. To locate and view a topic, use the table of contents, index, and search features.

To open help

Open the "\\Program Files (x86)\Interactive Intelligence\Interaction Collector\Documents" folder and

Tin: To adjust the width and height of the window or its panes, click the edge of the window or pane and drag it up or down, left or right.

5. **Toolbar:** Displays options for the help window.

6. **Tabs:** Displays the following:
then double-click **WebAccess.chm**.

Contents: Displays the table of contents. To display a topic in the **Content** pane, expand a book and then click the link.

Index: Displays the index. To display a topic in the **Content** pane, type a keyword or phrase in the box (or scroll through the list) and then click the link in the list.

Search: Displays the [search feature](#). To display a topic in the **Content** pane, type a keyword or phrase in the box and then press **Enter**. In the search results, click the link.

7. **Breadcrumbs:** Displays your current location within the help system. When you click a breadcrumb, the related topic displays.
8. **Content toolbar:** Displays an option to send feedback through an email message to Latitude by Genesys Documentation.
9. **Content pane:** Displays the contents of a topic. To view the **Content** pane menu, right-click in the **Content** pane.

Search feature

You can use the search feature to search for topics that contain words or phrases that you specify. You formulate a search query following a specific [set of rules](#). You can include [wildcard expressions](#), [Boolean operators](#), and [nested expressions](#) in your search query. A list of topics that match your search criteria appear in the search results. When you click a topic title in the search results, the content of that topic appears in the **Content** pane.

Search syntax

The basic rules for formulating search queries are:

1. Searches are not case-sensitive, meaning you can type uppercase or lowercase characters.
2. You cannot search for a single character or the following reserved words: an, and, as, at, be, but, by, do, for, from, have, he, in, it, not, of, on, or, she, that, the, there, they, this, to, we, which, with, you.
3. The search engine ignores punctuation marks and special characters such as @#\$%^&()=+[]\.
4. Enclose phrases and terms that include a period (such as a file name with an extension) in double quotation marks.

Wildcard expressions

Wildcard expressions allow you to search for one or more characters using a question mark or asterisk. A question mark represents a single character, while an asterisk represents one or more characters.

Search for...	Example	Result
Topics with text that starts with one or more specified characters and ends in any character or number of characters	log or log*	Returns all topics with text that starts with the specified characters (for example, log, logon, logging).

Topics with text that starts with the specified characters, has a single character that can be anything, and ends in the specified characters	32?57	Returns all topics with text that has any character where you placed the question mark (for example, 32?57 returns 32257, 32457, and 32857).
---	-------	--

Topics that contain all the words specified, in any order or placement within the topic	account status	Returns all topics with both account and status, but not necessarily as a phrase or in the order specified.
---	----------------	---

5

[Help Overview](#)

		For example, the search returns topics with "the account status..." or "the status of the account..."
Topics that contain the specified phrase	"account status"	Returns all topics with account status as a phrase. For example, the search returns topics with "the account status..." but not "the status of the account..."

Boolean operators

Boolean operators (AND, OR, NOT, NEAR) allow you to create a relationship between terms. If you don't specify an operator, the system uses AND by default.

Search for...	Example	Result
AND	account AND status	Returns all topics with both account and status, but not necessarily as a phrase or in the order specified. For example, the search returns topics with "the account status..." or "the status of the account..."
OR	account OR status	Returns all topics with either account or status, or both.
NOT	account NOT status	Returns all topics with account but not status.
NEAR	account NEAR status	Returns all topics where account is within eight words of status.

Nested expressions

Nested expressions allow you to perform complex searches. For example, queue AND ((collector OR clerical) not supervisor) finds topics containing queue and collector but not supervisor, or containing

queue and clerical but not supervisor. As with mathematical expressions, the system evaluates expressions in parentheses first. If there is no parenthesis, the system evaluates the expression from left to right. For example, queue NOT (clerical OR supervisor) finds topics containing queue but not clerical or supervisor. Queue NOT clerical OR supervisor finds topics containing queue but not clerical, or topics containing supervisor.

Generate a Report

Generate a Report

The reports you have access to are based on your permissions. Some standard reports require you to specify a date range.

To generate a report

2. In the **Navigation** tree under **Reports**, click the report type.

3. Click the report. If the report does not require a date range, the system displays the report immediately.
4. If the report requires a date range, do the following:
 1. In the **Start Date** box, type or select the start date for the report.
 2. In the **End Date** box, type or select the end date for the report.
 3. Click **View Report**.

[Report Options](#)

[Reports](#)

Report Options

The following table lists the options that are available when viewing a report.

Option	Description
	Displays the first page of the report.
	Displays the previous page of the report.
	Displays the next page of the report.
	Displays the last page of the report
N of 1	Current page number and the total number of pages. To display a specific page of the report, type the page number in the box and press Enter .
Zoom	Increases or decreases the text size when viewing the report on your monitor. Changing the text size here does not change the size of the text when you print the report.
Find/Next	Searches for all occurrences of the specified text. To search, type the text in the box and click Find . If there's more than one occurrence, click Next to display the next match.
Format	File format to which to export the report.

Export	Exports the report to the specified file format. To export the report, select the file format and then click Export .
	Refreshes the report data.

	Prints the report.

Account Status Report

This report displays summary and detail information for accounts in your custom customer groups. The system groups the information on account status.

- To display status details, click the plus sign (+) next to the status.
- To view account details, in the Account ID or ID column, click the account number.

Search for an Account

You can provide one or more search criteria to search for an account. If you search using the debtor's name, you can search using the exact name as it appears in the system or using a wildcard. For more information about wildcards, see [Wildcard Search](#).

To search for an account

5. In the menu bar, click **Search**. The **Search for Accounts** page appears.

Search for Accounts

Debtor SSN	<input type="text"/>
Debtor Name	<input type="text"/>
Account Number	<input type="text"/>
Phone Number	<input type="text"/>

View Report

Debtor SSN: Debtor's nine-digit social security number.

Debtor Name: Debtor's name. You can search using a wildcard.

Account Number: Your customer account number. You can search using a wildcard.

Phone Number: Any phone number (for example, work, home, cell) on the account.

1. Type search criteria into one or more boxes and then click **View Report**. The account that matches the search criteria appears.

Wildcard Search

You can use the % (percent sign) wildcard to search for accounts by customer name or account number. The % represents multiple characters.

For example, when searching on name, SM% returns all accounts where the customer name begins with "SM." When searching on account number, 12% returns all accounts with an account number that begins with "12."

View Account Detail

After locating an account using the search feature, you can view detail information for the account.

To view account detail

With an account displayed on the **Search for Accounts** page, click the collection agency's file number. The **Account** page appears. The Agency Details section only displays for accounts placed with an outside collection agency or attorney.

If you have the appropriate permissions, this page displays options for adding notes to an account and sending messages about the account to the administrator. For more information, see [Add a Note to an Account](#) and [Send a Message Regarding an Account](#).

Add a Report

Administrators can add a report that the client or collections agency created as a client report definition (.rdlc) file using Visual Studio. For more information about creating a report, see your Visual Studio documentation.

Note: If the report doesn't include a where clause, the report returns every record because the report writer doesn't add a customer or Class of Business "where" clause unless a "where" clause is present already. To ensure the report runs correctly, specify "where 1=1" in the report writer.

To add a report

- In the **Navigation** tree under **Admin**, click **Reports**. The **Report List** page appears.

Administrative Tasks

Report List			
	Name	Context	
Edit	Default_Account <i>The main report used for viewing accounts</i>	Account	Remove
Edit	Account Status <i>A detail of accounts report displaying current status, balance, etc.</i>	Summary	Remove
Edit	Acknowledgement <i>Acknowledgement report by date range showing accounts placed</i>	Summary	Remove
Edit	Default_Search <i>The default search report used when searching for debtors</i>	Detail	Remove
Edit	Batch Performance <i>Summary of batches, total placed and collections and fees with line chart showing placement dollar trend</i>	Summary	Remove
Edit	Placements and Collections <i>Summary of placements</i>	Summary	Remove
Edit	Invoice Summary <i>Summary of all Invoices by Date Range</i>	Summary	Remove
Edit	Summary <i>Graphical representation of placements, collections and fees over time</i>	Summary	Remove
Edit	StairStep S <i>Stairstep Report displaying Gross Collections based on the prebuilt numbers produced in Statistics Console</i>	Summary	Remove
Edit	StairStep % <i>Stairstep Report displaying Liquidation Percentages based on the prebuilt numbers produced in Statistics Console</i>	Summary	Remove
Edit	StairStep % (Prebuilt) <i>Stairstep Report displaying Liquidation Percentages based on the prebuilt numbers produced in Statistics Console</i>	Summary	Remove
Edit	StairStep S (Prebuilt) <i>Stairstep Report displaying Gross Collections based on the prebuilt numbers produced in Statistics Console</i>	Summary	Remove
Add new Report			

- At the bottom of the list, click **Add New Report**. The **Report Information** page appears.

Report Name: Name of the report.

Description: Description of the report.

Show in Menu: If selected, the system includes the report in the **Reports** section of the **Navigation** tree so that it is available to users.

Web Access Printable Help

Context: Context for the data in the report. Valid values are: Account, Detail, and Summary.

Category: Report category.

Report Definition File: File that defines the report. The file name extension is “.rdlc”. Click **Browse...** and then click the file name.

4. Complete the information and then click **Save**. If you selected to show the report in the menu, it appears in the **Reports** section of the **Navigation** tree.
