

New Features for:

Release:Latitude 2020 R1

Built on:28-Apr-2020

New features included in release 2020 R1

The table below summarizes the new features added in this release

SCR	Description/Details
-----	---------------------

All new features from prior releases

Below is the complete description of all prior releases new features that are included in this update.

New features in release 2020 R1

SCR	Description/Details
-----	---------------------

Component: Credit Bureau Reporting

LAT-10695	<p>Previously we do not have any provision to update the special comment on cbr accounts. This tool will provide the feasibility to update the special comment on accounts in bulk.</p> <p>You can now use CBR Comment tool to update the special comment on bulk cbr accounts at once.</p>
LAT-10392	<p>We process debt transfer accounts. When the account reports a 64, (early termination, balance owing) we would like these specific accounts to report a billing date that matches the file creation date. There will be a special note on master that equals "IDT". We would like to know how much it would cost to have this developed for us and how long it would take to complete.</p> <p>WHEN CBR Evaluation occurs, IF the nextaccountstatus is 64 AND the master.specialnote value is 'IDT' AND this is first party THEN set the billing date to the current date.</p> <p>Do NOT clear the master.specialnote value during evaluation, an account can be evaluated everyday, but the file only gets created once a month (essentially).</p> <p>Note that the master.specialnote value is also set when the account should be deleted from the bureaus. In this case there will be a DA for delete as error, DF for delete as fraud, or DI for delete as paid by insurance. If it is marked for delete, don't remove that delete value since delete will always take precedence over IDT</p> <p>It wouldn't be possible to have the delete and the IDT. If it's already been deleted, then the IDT wouldn't report to the bureaus. If it's reported with the IDT (which is a</p>

64), that's a final status so the DA wouldn't apply at the bureaus.

By Billing Date, are they referring to the "Date of Account Information" (field 24, base segment)

Component: Exchange

LAT-10682 **Exchange and Query designer update for Arvest new fields named LoanToValuePercentage and OriginalLoanToValuePercentage.**
Exchange and Query designer update for Arvest new fields named LoanToValuePercentage and OriginalLoanToValuePercentage

LAT-10629
